

Wayne Wheeler

Senior Editor, Computer Science (Books)

Springer London

wayne.wheeler@springer.com

My primary charge is to locate and engage first-rate authors and editors to develop monographs, textbooks and supplementary texts, and professional references for researchers, advanced students (also undergraduates), and professionals in the areas of:

- Theoretical Computer Science (all topics)
- Information Security and Cryptography (computational and mathematical aspects)
- Modelling & Simulation
- History of Computing, Philosophy of Computing, general Computer Science topics

I bring to prospective authors and editors nearly 25 years of editorial experience in publishing at the nexus of computing, information science, and engineering. I have worked in Springer's Boston (U.S.) and U.K. offices and have strong familiarity with North American and European markets. Plus, I worked for some years developing our CS Books strategy and development in India.

If you have project proposals to discuss or questions about working with Springer to develop quality computing-related books, I would be very pleased to hear from you.

Book Series managed:

- Information Security and Cryptography
- Texts in Computer Science [longstanding, dedicated textbook series-: all levels]
- Undergraduate Topics in Computer Science [concise and modular, dedicated textbook series:- undergraduate]
- Simulation Foundations, Methods and Applications
- History of Computing
- SpringerBriefs in the History of Computing
- History of Information Security
